WORK METHODOLOGY

ANALYSIS

Analysis is the first and most important step for any project. This process is initiated with discussion and a few queries to figure out the nature of the desired project and objectives. We too, analyze the design and functionality of the project that the client has visualized. Analysis helps in creating a basis for other work processes.

STRATEGY AND PLANNING

On the basis of requirements and objectives, a framework is derived and presented to the client. A detailed discussion is held to figure out if anything is to be added, improvised, or removed. Here we derive a final outline of design and functionality, develop strategy, and create work plans and schedules for mobilizing manpower and resources.

DESIGN AND DEVELOPMENT

As per the finalized strategy and plans, we proceed towards building the project. Our professional designers and developers use every possible technology to deliver 100% result.

STRATEGY AND PLANNING

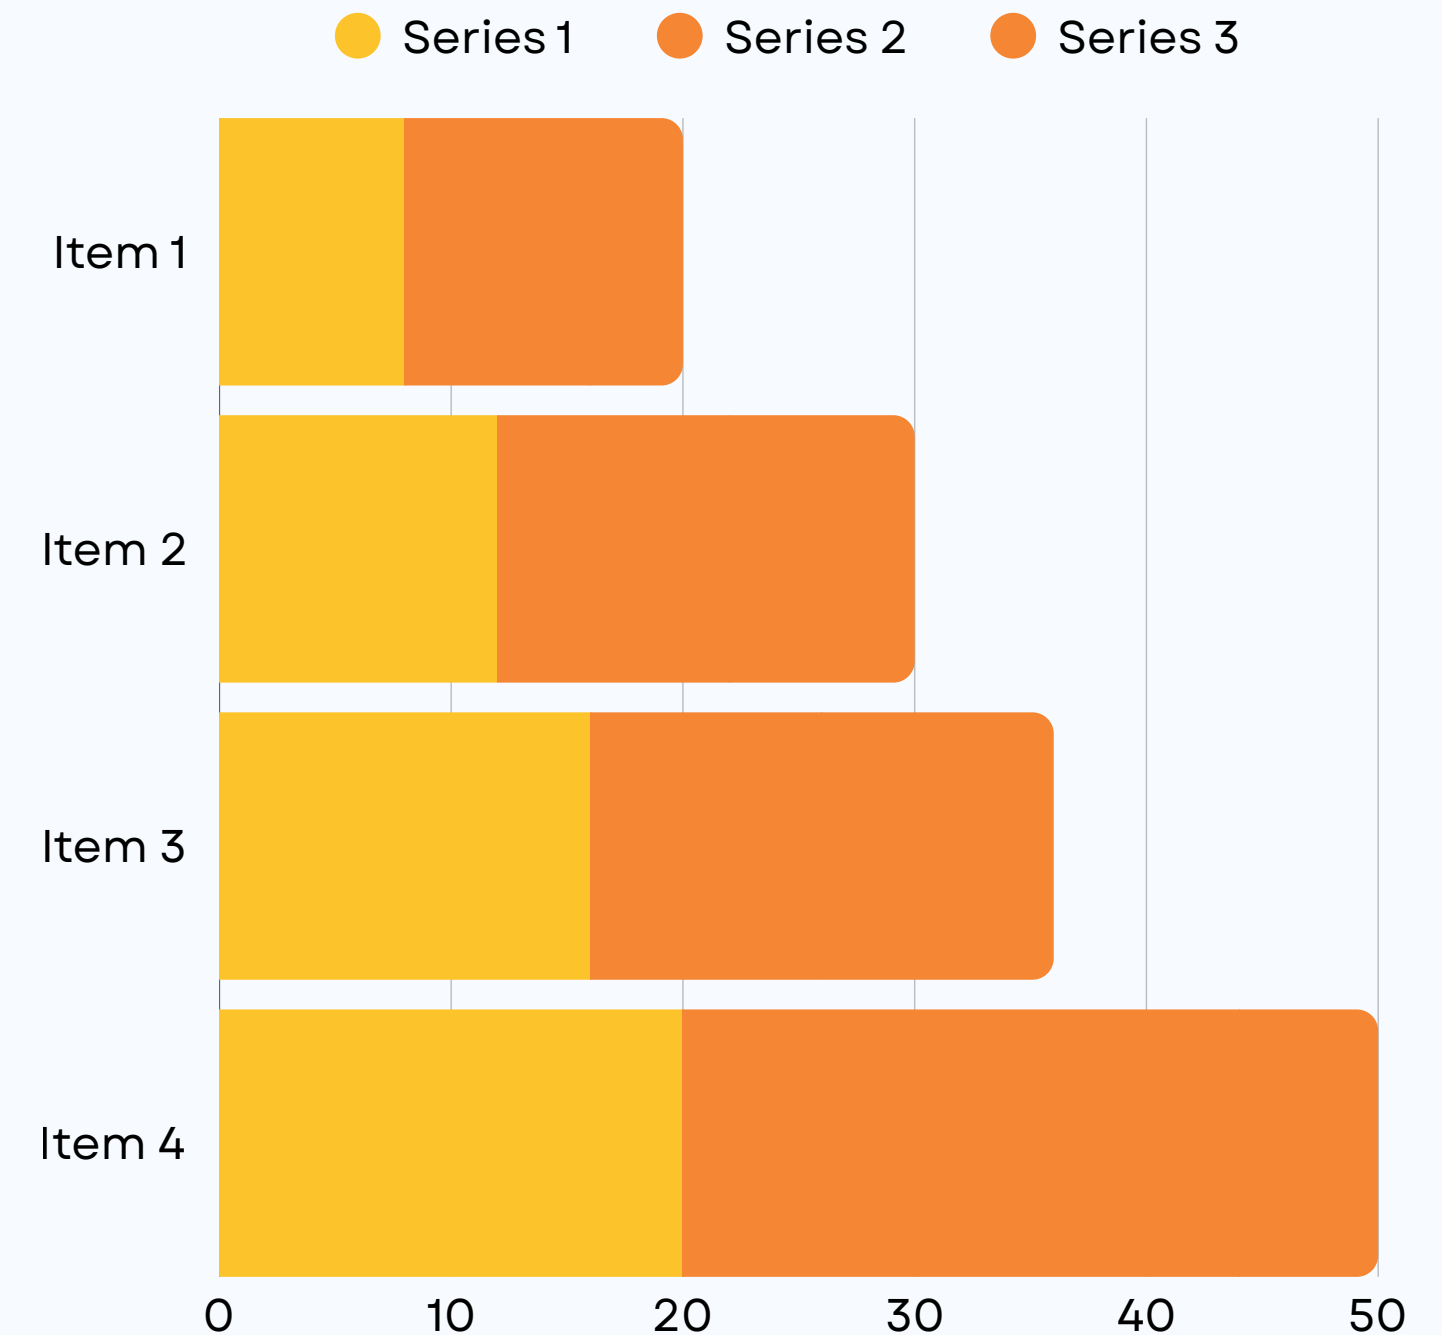

Following the design and development work, we undergo testing or observation from our side and then provide a demo copy to the client for the same purpose. This helps in figuring out any inaccuracies if present. After amending all the errors and weaknesses, if present, the deployment or delivery of the project is done.

MAINTENANCE AND UPGRADE

We have a separate team of experts who provide reliable support for the maintenance and upgrade of our projects. The team works to avoid errors and breaches and ensure that the products are up-to-date with the latest technology and deliver effective and efficient output with excellent performance.

INFOGRAPHICS

- At Fahim Shakir, we design visually compelling infographics that transform complex data into clear, impactful visuals. Our creative approach helps you communicate key information effectively, making it easier for your audience to understand, engage with, and remember important insights.
- Whether for presentations, reports, or digital marketing, our team ensures every infographic is tailored to your needs, combining creativity with clarity to deliver impactful visuals.

DELIVERING SUPERIOR DIGITAL SERVICES THAT GROW YOUR BUSINESS.

CLIENT REVIEWS

TALIBALI RAJPUT

Fahim is exceptional in his service. He did a very quick solution which worked perfectly as expected. He is very polite and listens to every issue as required. He is very professional and has deep experience in API integration. I highly recommend him for your projects. Will work with him again!

SACHIN VERMA

I had the privilege of working with Fahim on a recent website development project, and I'm extremely satisfied with the results. Fahim's technical expertise and attention to detail were evident from day one. He took the time to understand our vision and delivered a sleek, functional, and user-friendly website that exceeded our expectations. His communication throughout the process was clear, and he was always quick to respond to any questions or revisions. Fahim is professional, reliable, and skilled in all aspects of web development. I highly recommend him to anyone looking for top-notch web development services.

SIDDHARTH PRIYADARSHI

Extremely hands-on and knowledgeable about his domain. Fahim and I worked on a Wordpress project and it was very easy working with him. He is hardworking and goes out of his way to provide technical support when required.

GURJAS BEDI

After number of cheaters and fake developers, I finally found Fahim who helped me in developing my website just like I wanted. After completion of website services provided are true and reasonable . Would recommend everyone to get their work done from him.

FOYSAL AFRIDI

Great experience working on my personal website development project with Fahim Shakir Web Developer. He was professional and creative. Their dedicated approach to the work is commendable. I got user-friendly and incredible looking website within the stipulated time outstanding Ecommerce Website Designing and development. Thanks for giving my brand and my business great web presence and an added online edge.

GAURAV ARORA

Fahim has good conceptional knowledge regarding his developing domain. He has good command on different coding languages. He is hardworking and always reachable to get help.
